TABLE OF CONTENT

ABOUT US

Nigerian-owned technical supply company delivering reliable Electrical, Instrumentation and Industrial Procurement Solutions since 2021.

SPECIFICATION-DRIVEN SOURCING, QUALITY DOCUMENTATION AND RELIABLE DELIVERY FOR EVERY PROJECT WE SUPPLY

Powerlog Electrical Technologies Limited was established in 2021 as a Nigerian technical supply and engineering support company serving the energy, oil & gas, construction and infrastructure sectors.

We combine technical understanding, strategic sourcing, OEM engagement and documentation control to ensure every product supplied meets the required technical, commercial and project specification.

Why Choose Us

01. Technical Expertise

Our core competence is built around Electrical, Instrumentation and Industrial Procurement, matched precisely to each client's technical specification and application.

03. OEM Sourcing

We work with manufacturers, OEMs, authorized distributors and specialist suppliers to source standard and specialized materials, evaluated for compliance, availability, lead time and documentation.

**RELIABLE EXPERTISE,
QUALITY SOURCING,
RESPONSIVE
SERVICE
AND SOLUTIONS
BUILT AROUND YOUR
PROJECT NEEDS.**

Successful E&I procurement requires more than supplying products; it requires trust.

Our approach is designed to provide clients with a dependable technical supply partner capable of supporting both routine operational requirements and project-critical procurement. We combine specification-driven sourcing, OEM engagement, quality documentation and responsive service to keep every project on schedule.

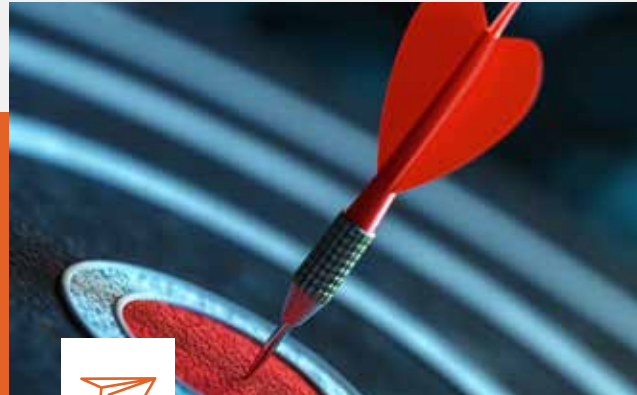

02. Quality & Documentation

We provide supporting documentation including technical datasheets, certificates of conformity, test certificates and calibration certificates — giving clients the verification and confidence needed for procurement decisions.

VISION

Powerlog's guiding vision for technical excellence and leadership.

VISION

To become a leading and trusted African technical solutions company, recognized for excellence in Electrical, Instrumentation and Industrial Procurement through innovation and reliability.

MISSION

Our mission to deliver compliant, quality-assured solutions.

MISSION

To deliver technically compliant, quality-assured Electrical, Instrumentation and Industrial solutions by combining technical expertise, reliable sourcing and efficient project execution.

Committed to responsive, specification-driven technical procurement and support.

We respond quickly to RFQs and technical enquiries, maintaining direct communication with clients and suppliers for fast, accurate turnaround.

This responsiveness extends across every project stage, from technical clarification through order monitoring and expediting, helping clients stay on schedule and avoid procurement delays.

OUR VISION

Where we're going, and how we intend to get there.

A trusted African technical partner, delivering compliant, quality-assured solutions through expertise and efficient execution.

B

OEM & Global Sourcing

Achieving our mission means working with manufacturers, OEMs, authorized distributors and specialist suppliers to source standard and specialized materials, evaluated for compliance, availability, lead time and documentation.

Powerlog Electrical Technologies Limited — turning our vision into every technically compliant solution we deliver.

A

Technical Expertise

Our vision for excellence is built on Electrical, Instrumentation and Industrial Procurement, matched precisely to each client's technical specification, application and environment.

C

Quality Documentation

Reliability starts with documentation — technical datasheets, certificates of conformity and test certificates that give clients verified confidence in every delivery

Technical procurement, sourcing, project support, and reliable solutions tailored to industry-specific requirements.

Procurement Efficiency

Our structured procurement process reduces sourcing delays and technical risk, allowing clients to receive compliant materials faster while maintaining full documentation and quality traceability throughout delivery

+78%

On-Time Delivery

This reflects our commitment to project schedules, combining supplier expediting, logistics coordination and documentation control to keep materials moving from order to site delivery.

Why It Matters

- Reduces procurement risk through specification-driven sourcing and verified technical compliance checks before order placement.
- Improves delivery reliability with structured expediting, logistics coordination and real-time material tracking support.
- Strengthens documentation control, ensuring every shipment includes verified records.

OUR SERVICES

TECHNICAL SUPPLY AND PROCUREMENT SUPPORT, END-TO-END.

Powerlog Electrical Technologies Limited provides end-to-end technical procurement and supply services for the electrical and instrumentation sectors.

RESPONSIVE TECHNICAL SUPPORT FOR EVERY RFQ AND ENQUIRY

Our team responds quickly to technical enquiries and RFQs, maintaining direct communication with clients and suppliers throughout the procurement process to ensure accurate, compliant and timely delivery of materials.

EVERY MATERIAL WE SUPPLY IS VERIFIED, DOCUMENTED, QUALITY ASSURED AND TRACEABLE.

A. TECHNICAL PROCUREMENT & SOURCING

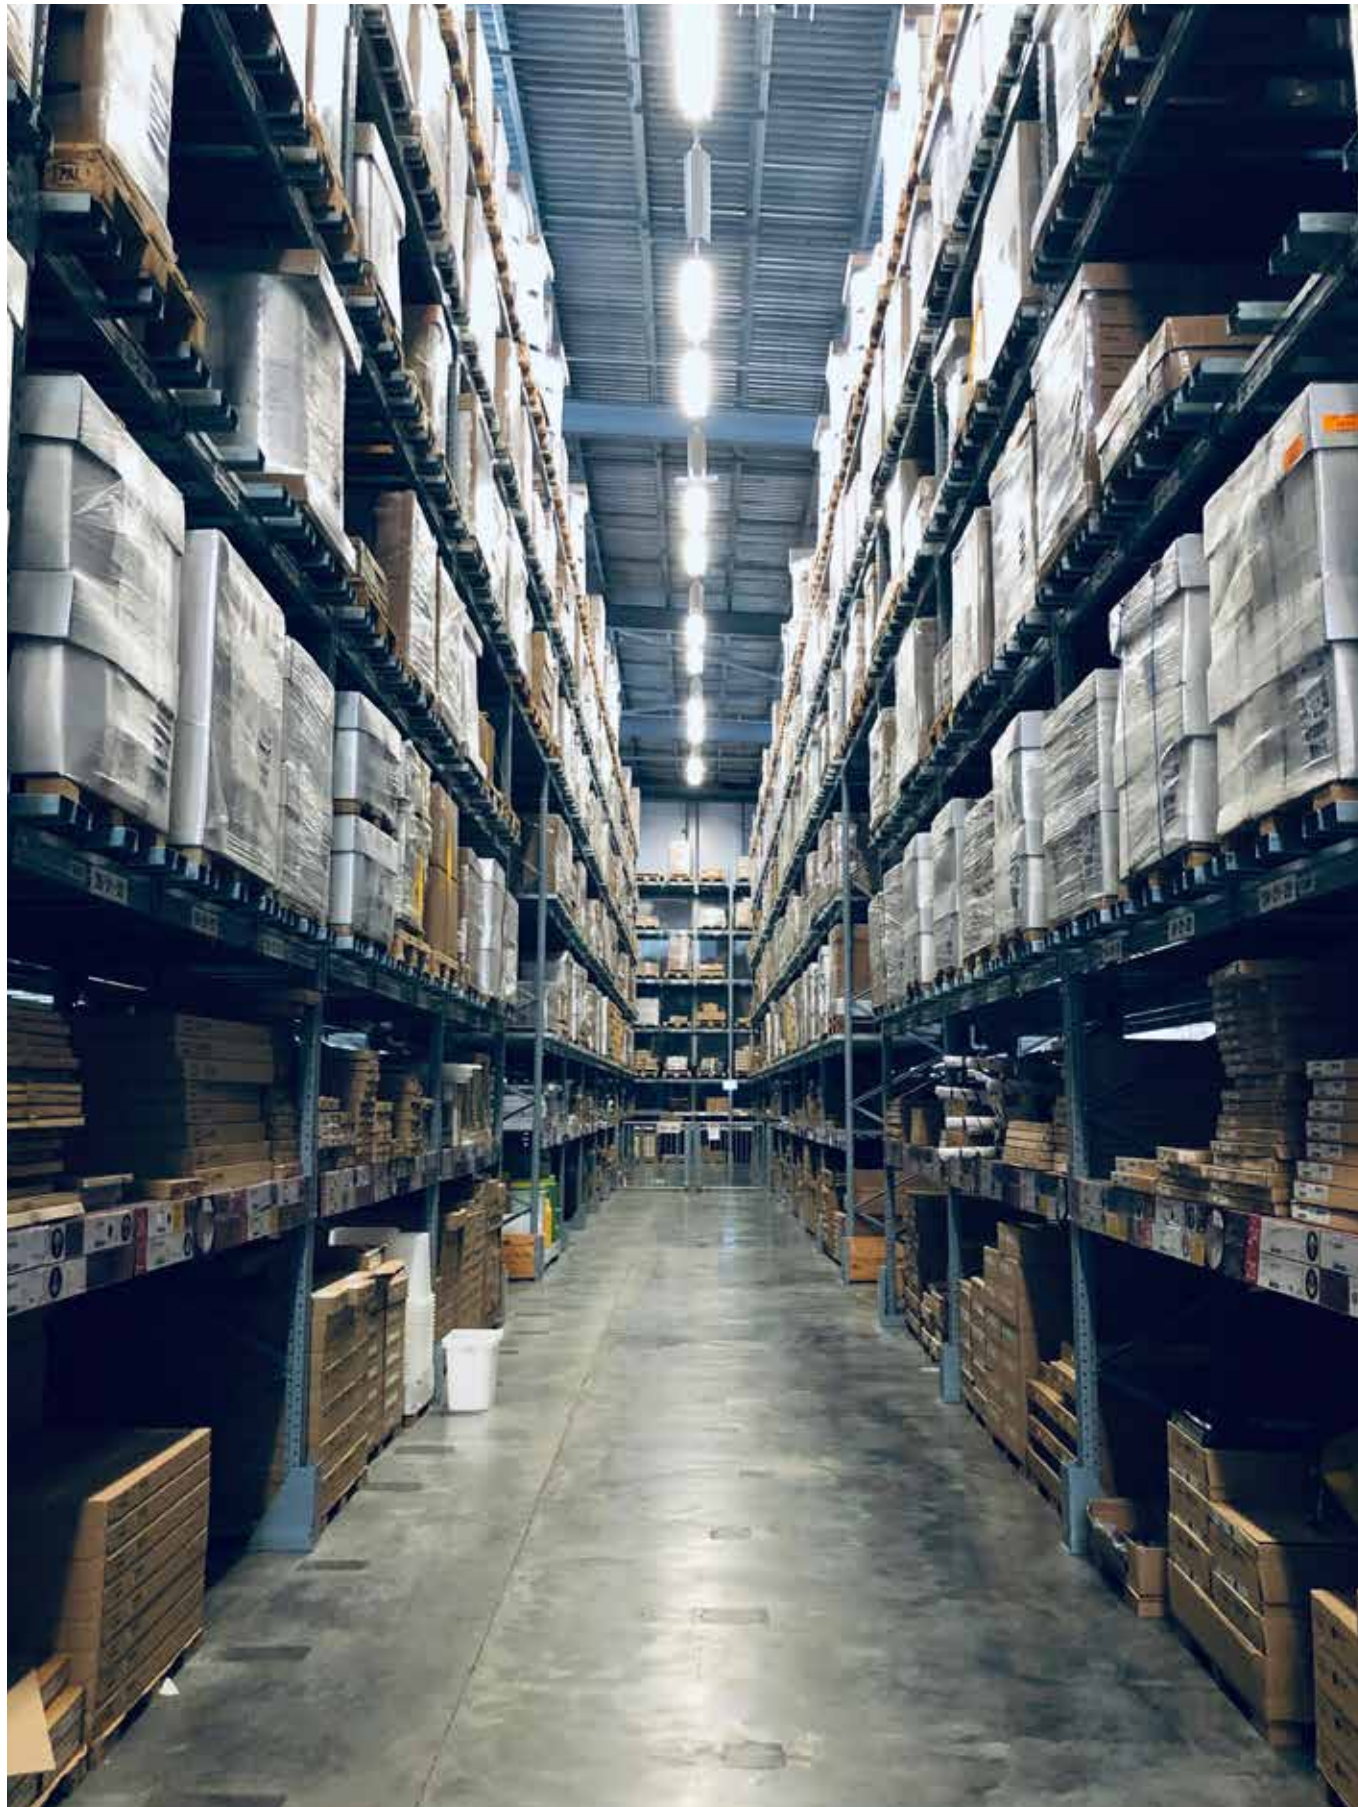

We source compliant electrical, instrumentation and industrial products through qualified OEMs, manufacturers and suppliers, ensuring suitable alternatives, value and timely procurement.

B. TECHNICAL BID & RFQ SUPPORT

We review RFQs, BOQs and specifications, evaluate quotations, identify deviations and prepare technically compliant offers and documentation for project requirements.

C. PROJECT MATERIAL MANAGEMENT

We coordinate procurement planning, supplier expediting, material tracking, inspections, documentation, logistics and delivery to support efficient project material management.

D. QUALITY ASSURANCE & DOCUMENTATION

We support supplied materials with relevant technical, quality, certification and traceability documentation required for verification, compliance and project records.

E. ELECTRICAL & INSTRUMENTATION SUPPORT

We provide technical support for electrical and instrumentation installation, testing, termination, commissioning, loop-checks, troubleshooting and related project activities.

F. LOGISTICS & DELIVERY MANAGEMENT

We coordinate local and international logistics, freight, supplier follow-up, material consolidation, delivery scheduling, tracking and documentation handover.

Key Advantages

SPECIFICATION-DRIVEN SOURCING, NOT PRICE ALONE

Products are sourced by technical requirements, ensuring suitability and not price alone.

INTEGRATED QUALITY AND DOCUMENTATION CONTROL

Every material supplied is backed by verified certificates, datasheets and traceability records for project confidence

Powerlog's specification-first approach helps clients reduce procurement risk and maintain full documentation control.

96%

CLIENT RETENTION

Our clients return because we combine technical understanding, dependable sourcing and transparent documentation – building lasting, trusted partnerships.

This consistency reflects our commitment to quality, responsiveness and client-focused service.

● REPEAT CLIENTS

Many of our clients return for ongoing procurement needs, reflecting confidence in our technical expertise and dependable project execution.

● LONG-TERM PARTNERSHIPS

We build lasting relationships through consistent communication, reliability and transparency.

01 Electrical Products & Materials

Power and control cables, cable glands and lugs, cable trays and trunking, junction boxes, distribution boards, switchgear, circuit breakers and industrial lighting, among others.

02 Instrumentation Products

Instrumentation and signal cables, junction boxes, terminal blocks, pressure and temperature transmitters, flow instruments, control valves, solenoid valves and calibration equipment, among others.

03 Industrial Automation & Control

PLC and HMI systems, industrial communication equipment, variable frequency drives, motor control equipment, control panels, proximity and photoelectric sensors, among other automation products.

04 Explosion-Protected Products

Ex-rated junction boxes, enclosures, cable glands, switches, isolators, lighting fixtures and control stations, sourced according to hazardous-area classification and certification requirements.

05 Earthing, Lightning & Electrical Protection

Copper earth rods, tape and conductors, earth clamps and bars, bonding accessories, lightning protection systems, air terminals and surge protection devices.

06 Electrical Test, Measurement & Calibration Equipment

Digital multimeters, clamp meters, insulation and earth resistance testers, process and loop calibrators, temperature calibration equipment and portable electrical measuring instruments.

07 Industrial Tools & Technical Consumables

Insulated hand tools, cable preparation and crimping tools, termination and torque tools, industrial tapes, identification materials and project-specific consumables.

OUR PRODUCTS

BRANDS, OEMs & MANUFACTURERS

Powerlog works with OEMs, manufacturers, authorized distributors and specialist suppliers to source products according to specific client and project requirements.

Our sourcing model is manufacturer- and specification-driven, allowing us to identify the appropriate brand based on the required technical specification, availability, certification, lead time and commercial considerations.

SUPPLY MAY INCLUDE INTERNATIONALLY RECOGNIZED MANUFACTURERS ACROSS KEY AREAS SUCH AS:

- Electrical distribution and protection
- Industrial automation
- Instrumentation and process control
- Cables and cable accessories
- Hazardous-area equipment
- Industrial lighting
- Test and measurement
- Earthing and lightning protection
- Cable management
- Industrial enclosures
- Automation and control

RC:1776319
Powerlog
ELECTRICAL TECHNOLOGIES LIMITED

OIL & GAS

Supplying technically compliant E&I materials to operators, EPC contractors and maintenance teams.

Power & Energy

Supporting power generation, transmission, distribution and industrial power users with reliable materials.

EPC Contractors

Providing BOQ-based procurement, technical compliance review and multi-vendor material sourcing support.

Marine & Offshore

Supplying marine-grade E & I products for coastal and offshore applications

Construction & Infrastructure

Supplying electrical materials and technical procurement to developers.

Petrochemical & Process Industries

Providing specialized instrumentation and control products for demanding process environments.

Mining & Heavy Industry

Supplying robust electrical and instrumentation materials for demanding mining operations.

Commercial Facilities & Projects

Serving commercial buildings and institutional clients with dependable electrical supply solutions.

Industrial & Manufacturing

Supporting manufacturing plants with automation, instrumentation and maintenance-related materials

INDUSTRIES SERVED

**DOCUMENTATION**

When required, We provide required product documentation for verification and compliance including:

- Certificate of Conformity (CoC)
- Manufacturer's Certificate
- Factory/Test Certificates
- Calibration Certificates
- Technical Datasheets
- Product Catalogues
- Country of Origin documentation
- Warranty Certificates
- OEM/Distributor Authorization
- Material Certificates
- Inspection Reports
- Product identification and traceability documentation

We also support sourcing and supply in accordance with applicable:

- IEC — International Electrotechnical Commission Standards
- ISO — International Organization for Standardization
- BS — British Standards
- ATEX — Explosive Atmospheres requirements, where applicable
- IP Rating requirements
- NEMA requirements, where specified
- Applicable OEM/manufacture standards
- IECEx — International Electrotechnical Commission System for Certification to Standards relating to Equipment for use in Explosive Atmospheres, where applicable

“ Safety First. Excellence Always

At Powerlog, we believe that quality, safety, environmental stewardship and operational excellence are not separate responsibilities; they are fundamental to the way we do business.

Management leads by example; all partners uphold these standards.

QHSE COMMITMENT

At Powerlog Electrical Technologies Limited, Quality, Health, Safety and Environmental (QHSE) excellence is an integral part of the way we conduct our business. We are committed to delivering reliable, compliant and high-quality electrical and technical solutions while

protecting our people, the environment, our clients, assets and other stakeholders.

Our QHSE commitment is founded on leadership, accountability, risk-based thinking, operational excellence, employee participation, regulatory compliance and continual improvement.

WE ARE COMMITTED TO:

Quality Excellence

Delivering products and services that consistently conform to client specifications, applicable standards and regulatory obligations.

Health & Safety

Providing safe working conditions, preventing occupational injuries, and systematically identifying and controlling workplace hazards and risks.

Environmental Responsibility

Preventing pollution, minimizing environmental impact, reducing waste and promoting responsible, sustainable business practices.

Legal & Regulatory Compliance

Complying with all applicable statutory, regulatory and contractual QHSE requirements while applying recognized international standards and best practices.

Risk Management

Integrating QHSE risk assessment and effective control measures into planning, procurement, execution and project delivery.

Competence & Participation

Ensuring employees, contractors and partners have the competence, awareness and resources to perform their responsibilities safely and effectively.

Stop Work Authority

Empowering every employee and contractor to stop work when an unacceptable QHSE risk is identified, without reprisal.

Continual Improvement

Establishing measurable QHSE objectives, performance and continuously improving our management systems and operational standards.

Incident Prevention & Learning

Promoting proactive hazard reporting, investigating incidents, implementing corrective actions and applying lessons learned to prevent recurrence.

Supply Chain & Contractor Management

Working with competent suppliers, OEMs and contractors whose quality and QHSE performance aligns with our standards.

With Our Gratitude!

With our gratitude, we welcome the opportunity to work with you. Reach out for RFQs, technical enquiries or procurement discussions — we're ready.
